These number paths are the perfect visual for students who need support with place value as they work on various concepts in math.

The paths take learning beyond a hundreds chart and provide a scaffold for students who aren't quite ready for working on an open number line yet.

They can be used to support so many math concepts, including:

- 10 more and 10 less
- multi-digit addition and subtraction
- multiples
- number patterns
- even and odd
- rounding

You can create a path of any length (up to 200).
The number paths can be printed on standard letter paper and laminated, so your students can interact with the numbers using a dry erase marker.

Please don't hesitate to reach out with any questions! Thanks for taking the time to preview this resource!
